SEND Support during Corona virus and Beyond

This is a list of information websites, tips and resources to help you support your children with their additional needs, learning and self-esteem. Children have varying needs and there is no one size approach fits all.

It is quite common for children to have additional needs that span all these areas, so select the resources that meet the needs of your child, without worrying too much about the label or category they fall under. Everyone has strengths and weaknesses and these SEND strategies will be beneficial to many children, whether or not they have a diagnosis.

	ASD

Websites	https://www.autism.org.uk/about/family-life/parents-carers.aspx
Tips	 Children with Autism need structure and routine. You can help them by using visual timetables to help them see what is happening at each step of the day, so they know in advance what they will be doing next. This will relieve some of their anxiety.
	- You might want to set a specific place for them to do any work or tasks. At school they may have this in the form of a workstation to support their learning (see example in resources section). Each child's workstation may differ slightly, so you could ask your child to help you set one up that will suit them or that they are already used to.
	- Prepare them for changes in routine.
	 Help your children to recognise and name different emotions and feelings. You can do this by discussing their own emotions, how characters in books and on TV programmes might be feeling and how you yourselves might be feeling. Alongside naming the emotion, describe it and explain why you, they or fictional characters might be feeling like that. You can also play role play guessing games and ask them to name the emotion and say why.
	- Use a 5 point scale to support children in managing their emotions.
	- Use social stories and comic strip cartoons to help children understand different situations and perspectives and address inappropriate behaviour.
	- Have a visual aid to support wanted and unwanted behaviours (see School Website for examples).
	- Be aware of your child's sensory needs and support them in managing that need to help them learn e.g. sound reducing earphones if noise is a problem, comfortable clothes, keep the area surrounding the work space clear to avoid over-stimulation etc.
	- Play lots of games with your child to encourage social skills, such as taking turns and winning and losing.

	Managing ADHD - http://www.adders.org/info58.htm
Tips	- Offer routines and structure
,	- Create a quiet space for them to learn with no distractions.
	- Give them something to fiddle with whilst you are talking to them or you want
	them to focus. It can also be helpful to let them move around whilst they
	listen.
	- Ask them to do one task at a time
	- Provide checklists or visual timetables to support organisation.
	- Use timers to help with time management and build in frequent movement
	breaks.
	- Suggest rather than criticise (children with ADHD often have low self-esteem)
	- Provide lots of opportunities for exercise and movement.
	- Set up a reward scheme to encourage them and support them with their
	behaviour.
	- Build on success and help children to pursue more of what they enjoy.
	- Put clear boundaries in place.

	study-skills/8-working-memory-boosters
Tips	- It is important to encourage children to recognise and pursue the areas in which
	they excel (do more of what they enjoy) and support them with the areas they find difficult.
	-Allow children to use a word processer to complete some written tasks. This
	highlights spelling errors and offers alternatives. If they can't type, encourage
	them to learn, so that they are able to use a Word Processer with more speed and fluency.

	-Play games to support memory and retention e.g. pairs, Go Fish etc. (see resource links for more ideas)
	-Enable children to access age related audiobooks to develop a love of reading. Encourage (don't force or push) them to share what's happening in the story and share their excitement, wondering aloud what will happen next. This will also develop their vocabulary and comprehension, without them even realising that they are learning.
	-Don't make reading a fight. Encourage chn to read one page and you read the next page. Read some books to them for pleasure and invite them to read a section if they want to (don't push if they don't want to). By developing a love of books and stories children will naturally want to learn how to read, so make the experience as pleasurable as you can.
